

Wayne O Evans

I am a 76 year young retired IBM employee with excellent computer skills, team leadership, project management and communication skills. These skills plus my web design and implementation are skills your organization can use.

My background, work history, and resume can be downloaded from www.woevans.net

Lets answer the question you must have.

“Why does as 76 year old seek employment?”

Simple I enjoy work, intellectual stimulation of colleagues, and new challenges. A good job allows me to use my skills and provides the services you need. I want to help an organization the improves life for kids through education.

I seek a job that can be done from my home. Few meetings and independent work that can be done at early hours of day is my preference. I can be available for during normal business hours (8-5) but not on regular basis. **I do not want a full time job as I like retirement life but want intellectual stimulation and new challenges.**

My greatest asset: **I am willing to learn and work hard.**

- Toastmasters International
- *Tucson Computer Society*

Volunteer

In my high school and college years, I held various elected positions in student organizations.

I served in voluntary positions at Tucson Estanted Property Owners Association

- Bring WIFI service to TEPOA
- Chair of Crime watch
- Board of Directors (2008-2010)
- Special committee to recommend use of 14 acres

I design web pages for charities and have completed 14 different websites. I find charities that request help using TAPROOOT+. I continue to volunteer my time

Pay it Forward

I had a very successful career and believe that education is the key to long term success. Therefore I have founded scholarship fund raising and support the schools I attended. I will not give a homeless person any money but give to charities that help the less fortunate.

Someone had a quote that summarizes my charitable giving:

*“Give a man a fish and he eats for a day,
teach a man to fish and he feeds his family forever.”*

Many college alumni give to support the athletic teams. I firmly believe that the primary role of educational institutions is to educate students NOT create more over-paid coaches, professional athletes, and expensive sports stadiums. I support education.

Examples of My Work

The following are links to web sites that I participated in design and implementation. There are three levels of my involvement from least to most influence.

- Consult on design but no implementation
- Part of a team that implemented site I worked on individual pages
- Full design and implementation

Other than my personal web sites the websites already existed and I simply made improvements to the existing site

Consult on design (no implementation)

- <http://savethewater.org/>
- <https://www.dallasheroesproject.org/>
- <http://www.caringforchildren.org/>
- <http://bigeq.org/>
- <http://solarheadofstate.org/>

Part of a team that implemented site I worked on individual pages

- WordPress <http://www.sosflorida.com/>
- WordPress <http://arinow.org/>
- WordPress <http://www.gangalib.org/>
- WordPress <http://www.seeingisbelieving.vision/>
- WordPress <http://lovelandyouthgardeners.org/>

Full design and implementation
